

ARNOLD ARBORETUM, HARVARD UNIVERSITY.

Jamaica Plain, Mass., April 4, 1895

My dear Dr. Kennedy:

I want to thank you in the name of the Arboretum for the copy of Michaux that you left here the other day. For several years I have been looking for this edition of Michaux's book and this is the first copy I have ever seen. You can well imagine then how delighted I am to have it added to the library of the Arboretum.

Again thanking you,

I am,

faithfully yours,

C. S. Sargent

Dr. G. Kennedy,
Readville, Mass.

ARNOLD ARBORETUM, HARVARD UNIVERSITY,

Jamaica Plain, Mass.,.....September 12, 1898.

Dear Dr. Kennedy:

I am much obliged for the specimens of Mountain Ash. The two look very differently certainly in the size of the fruit, the larger of the two evidently ripening some time before the other. There is not very much difference in the leaves. Do the leaves when perfectly fresh show any difference of color? On one they are blue and on the other yellow-blue?

I am very sorry not to have you for a companion on our journey. I expect now, if Muir arrives as he said he would on the 16th, that we shall start early Monday morning.

Faithfully yours,

C. S. Sargent.

Dr. George G. Kennedy,
Willoughby Lake House,
West Burke, Vt.

ARNOLD ARBORETUM, HARVARD UNIVERSITY,
JAMAICA PLAIN,
MASS.

October 6, 1904.

Dear Dr. Kennedy:

Absence from home has delayed until now the acknowledgment of your note of the 12th of September and of the fruit of *Crataegus* from Willoughby Lake. I am greatly obliged to you for them both. This *Crataegus* seems to me undescribed and I hope we can do something about it this winter.

I hope you will pay us another visit soon.

Faithfully yours,

L. S. Fernald

Dr. George G. Kennedy,
Rea ville, Mass.

ARNOLD ARBORETUM, HARVARD UNIVERSITY,
JAMAICA PLAIN,
MASS.

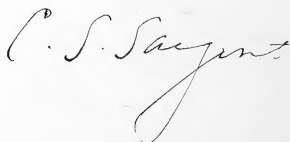

..... May 8, 1905.

My dear Dr. Kennedy:

The flowers of that peculiar *Crataegus* that grows on the summit of Mt. Willoughby have never been collected. Can't you get them for us this spring? The collection won't be complete without *Crataegus Kennedyei* and this is a good one for the name. If you get the flowers, do not forget to note the number of stamens and styles and the color of the anthers.

I wish we saw you more frequently here.

Yours very truly,

Dr. G. G. Kennedy,
Readville, Mass.

Jamaica Plain, Mass.,..... June 22,..... 1905.

My dear Dr. Kennedy:

I am much obliged for your note of the 17th as well as for the specimen brought over by Mr. Faxon.

We were sorry to miss you at the meeting of the Botanical Club which I believe the members enjoyed. I should like to have such a meeting every year if all goes well.

As for the *Crataegus* on top of Mt. Willoughby, it would seem to be up to you to make another trip and get the flowers. Life is uncertain and it would be a pity to let ^{the} ~~it~~ go over another year if there is any way of preventing it.

Faithfully yours,

C. S. Sargent

Dr. George G. Kennedy,
Readville, Mass.

MASS.

December 10, 1908.

My dear Dr. Kennedy:

Many thanks for your prompt compliance
with my request for help for the Arboretum. I
wish you would come and see us here often.

Faithfully yours,

C. S. Sargent

Dr. George G. Kennedy,
Readville, Mass.

ARNOLD ARBORETUM, HARVARD UNIVERSITY,

Jamaica Plain, Mass., October 19, 1909.

My dear Sir:

The Arboretum, having succeeded in raising a number of new and extremely interesting Chinese trees and shrubs, is prepared to distribute small collections of these to its friends and benefactors in slight acknowledgment of their generosity to this establishment.

If you care to receive one of these collections, I shall take great pleasure in having it sent to you this autumn.

Faithfully yours,

A handwritten signature in cursive script, reading "L. S. Sargent". The signature is written in dark ink and is positioned to the right of the typed name of the recipient.

Dr. George G. Kennedy,
Readville, Mass.

UNIVERSITY CLUB
SAN FRANCISCO

My dear Kennedy

I was greatly shocked to hear of the death of our dear old friend Almon Dodge. I had understood that his usual trip to California in the spring had been deferred until fall because he was not feeling as well as usual, and I was expecting at any time to hear of his arrival here. You may imagine the shock that the news of his death

gave me under these circumstances.

It is a great pleasure to recall the charming visit I had with Almon at your home in 1907, following the luncheon at the Union Club with so many of the old Roxbury boys. It was the occasion of delightful reminiscences of our far-away school days and made a red-letter day in my life.

The uncertainty of life was emphasized by the death within a few days of that luncheon of Charlie Ellis, and now another

one of the circle of old friends has passed on, and I hear that Jack Amel is very seriously ill.

I do not know what members of Almon's own family you see, but I wish you would convey my sincere sympathy to any such and express my deep regard for him.

Will you kindly make my regards to your wife and family, and believe me,

Yours sincerely,
J. Seymour Stouance

ROBERT SALTONSTALL
50 STATE STREET
ROOM 88
BOSTON, MASS.

November 9, 1910.

Dr. George G. Kennedy,
Readville, Mass.

My dear Dr. Kennedy:

I have talked with my neighbor, Tucker Burr, about your land which borders on the rear of our places, and we agreed that, though we did not want the land for practical purposes, the acquisition by each of us of such part of your land as borders on our places would to some extent be of benefit to them in that it would make them continuous from Milton Street to the Park.

On the other hand in some ways a large place is less marketable than a small one in our vicinity. See for example the length of time the Stevenson and Minot places have been in the market without customers.

Then also this is a particularly dry season and your land appears now quite dry, but it is ^{normally} ~~nevertheless~~ in parts very wet and would necessitate extensive drainage operations to make it of use.

I have made some inquiries as to prices paid for land in this vicinity, and find that the Wolcott land which was sold for the Parkway brought about \$300. an acre. Mr. Burr bought his field which borders on Blue Hill Avenue from the Wolcott Estate for about \$400. ^{per acre.} Of course the building of the Parkway has added to the value of your piece somewhat, although Mr. Ellerton Whitney tells me that the prospect of building the additional park road

ROBERT SALTONSTALL
50 STATE STREET
ROOM 88
BOSTON, MASS.

is very remote as there is practically no demand for it.

I have persuaded Mr. Burr to join me in an offer of \$3,000. for your piece which I understood you to say was about eight and a fraction acres.

Awaiting your decision in the matter, I am,

Very sincerely yours,

Robert Saltonstall.

ROBERT SALTONSTALL
50 STATE STREET
ROOM 88
BOSTON, MASS.

January 16, 1911.

Dr. George G. Kennedy,
Readville, Mass.

My dear Dr. Kennedy:

I beg to thank you for your letter of January 13th in regard to the piece of land on which Mr. Burr and I made you a proposition on November 9th.

Of course, in order to make this proposition, it was necessary for us, in order to get an idea of the value of this land, to see what sales had been made in the vicinity, and at what price. As stated in my previous letter, we found that the price had run between Three and Four Hundred Dollars an acre, and consequently made our offer on this basis. If our offer is not satisfactory to you, would you kindly give us your idea as to what the land is worth? Also we should be glad to know at what value it is assessed by the town. We want to be perfectly reasonable in the matter, and should like to know your ideas as to price.

Very truly yours,

*In conversation Robert Saltonstall
told him my price was \$100,000*

RULES

OF

Sandberg's Botanical Exchange Bureau.

1. Well prepared and identified specimens of Phænogams, Vascular, Cryptogams, Mosses and Fungi will be accepted for distribution.

2. Fruit, flowers and leaves should be furnished whenever practicable. Roots and root leaves must be furnished when characteristic. Both sexes of dioecious species must be furnished. The entire plant of all herbaceous species less than two feet high should be sent folded to within the size of the standard herbarium sheet (11 1/2 x 16 1/2). Specimens must be well pressed and of good color.

3. As early as Dec. 1, of each year, correspondents should send in lists of specimens which they may desire to exchange. These lists may be by number or by name, strictly in the order of Patterson's catalogue, and should indicate the number that can be furnished of each species.

4. Requisitions will be based by the Bureau upon these lists, and must be filled promptly.

5. In sending in specimens single sheets of plain light manilla paper, varying not more than one inch either way from 11x16, must be used. One complete specimen with its label giving name, locality, date, and name of collector must be placed on each sheet, those of the same species being contiguous, and all arranged in order of Patterson's catalogue.

6. Material enough to cover at least 30 square inches should be sent with each label. This means several individuals of small plants, and more than a twig of larger ones.

7. All costs of carriage must be defrayed by correspondents, which, however, this system will reduce to a minimum.

8. Upon receipt of a package of specimens, they will be at once inspected. Any discolored, badly wrinkled or defective specimens will be rejected. Scanty specimens will be condensed by doubling them up. From the number of good specimens thus determined one-fifth will be deducted as compensation for the Bureau. Four-fifths, or 80 per cent., of the specimens found satisfactory will be placed to the credit of the correspondent.

9. No fee will be exacted nor charge made for correspondence.

10. When desired the Bureau will advise what plants should be collected and correspondence to this effect will be welcome.

11. An annual list of duplicates ready for distribution will be mailed to correspondents not later than February 1. Requisitions will receive prompt attention.

12. Desiderata can be had at the rate of \$7.00 per hundred.

13. So far as applicable the same rules will govern cryptogamous plants. All specimens and correspondence should be addressed to

SANDBERG'S BOTANICAL EXCHANGE BUREAU,

501 CENTRAL AVE.

MINNEAPOLIS, MINN.

MINNEAPOLIS, MINN., JAN. 16, 1893.

DEAR SIR:

After carefully considering the situation and as the result of no little correspondence, I have decided to invite the co-operation of botanists in the establishment of a botanical exchange bureau. Although such efforts have not hitherto been uniformly successful yet several considerations have encouraged me to embark in the undertaking with hope of a better fate:

1. The number of botanists and amateur collectors is rapidly increasing.
2. A large depot issuing an extended exchange list will facilitate the acquisition of good herbarium material, by obviating the necessity of getting many small parcels often of worthless specimens.
3. Collectors will be enabled to dispose of their duplicates in one inexpensive shipment instead of by making up and dispatching numerous small packages.
4. By having a chance to send in a large number of duplicates of plants of local habitat, each collector will be able to obtain the full advantage of his local flora.
5. As the bureau will not accept or distribute poor material, correspondents will be spared much vexation of spirit and good field work will be encouraged.
6. Good collectors will be brought to notice through their specimens. It will be the purpose of the bureau to save labor in handling specimens, not to supplant personal correspondence.
7. The Botanical Division of the Department of Agriculture has decided, after consulting the members, to turn over to me the work of the Botanical Exchange Club. This will give the bureau the countenance of the Department at Washington and will secure the valuable advice and co-operation of Dr. Vasey and his corps of assistants.
8. Specialists have kindly promised their services in verifying doubtful specimens.
9. Last, but not least, I shall aim to make the bureau a source of personal profit, without which no institution of this kind can be made permanently successful.

I propose giving the matter of exchange the closest personal attention and hope to build up a bureau which shall command the respect of botanists at home and abroad and to which those in search of material may turn with confidence.

Enclosed please find a set of preliminary rules. Your suggestions, advice and co-operation are solicited.

If you would care to effect an exchange through the bureau this season, please send in at once your list in accordance with Rule 3, that the first distribution may be delayed as short a time as possible, 40,000 duplicates have already been secured.

Sincerely,

J. H. SANDBERG.

MASONS' BUILDING MATERIAL.

Readville, Mass., Feb. 16, 1912

Dr. G. G. Kennedy,

Readville, Mass.

Dear Sir:-

We have delayed writing you in relation to the chestnut trees taken from your place in Milton in order to get the wood into shape so that we could take the measurements of it. We have done this work as quickly and as cheaply as possible, and have converted all the wood into as merchantable shape as could be split, but we fear the result has been anything but satisfactory.

We hired Mr. Mahoney to haul the wood to our yard, which required two days labor at an expense of \$10.00. In addition to this our man worked five (5) days at \$1.84 per day, or \$9.40, making a total for labor of \$19.40. In return there are about five (5) cords of cleft wood and four or five trunks which would cost double their value to split.

We are paying today for chestnut wood delivered at our yard \$5.00 per cord, which would make \$25.00 for this lot less the \$19.40 for labor. We will, however, send you our check for \$10.00, as we may be able later to sell the trunks for something.

The wood is piled at our yard at the corner of West River and Milton streets, and if you would like to have your man call and measure it if he will call at our Readville office we will drive him up there. If this is not satisfactory kindly let us hear from you.

Yours respectfully,

F. W. Sawtelle

C. W. SAWYER
41 HUMPHREYS STREET
BOSTON, U. S. A.

March 30, 1911.

Dr G. G. Kennedy,

Dear Doctor; Thank you for your kind offer of a Harvard
rifle; I shall be most happy to accept it.

Please tell me what you know of its service;
Civil War, or Indian.

The influence of firearms upon history, par-
ticularly American, has long been a hobby. I have collected
several hundred old time firearms, sporting and military,
from the times of the Pilgrims to the present day; and I
hope to make the collection a permanent one. The Art Mu-
seum is showing 75 or 80 of them; the rest are temporarily
in storage. I hope to have the pleasure of meeting you and
showing you some of them.

Very truly,

C. W. Sawyer.

C. W. SAWYER
44 HUMPHREYS STREET
BOSTON, U. S. A.

April 7, 1911.

Dear Doctor;

Thank you very much for the Weynara Rifle. I did not possess a specimen of such early date; and I shall be glad to have this one put in perfect order, and add it to the collection.

I regret missing your call; but I trust that we may yet meet, and have a good talk. Would you honor me by spending an evening with me soon, at the old Homestead? I have almost no arms here- perhaps a dozen or two- because we do not expect to live here beyond this year, for one thing, and for another for fear of loss by fire. Except the 75 or 80 pieces shown at the Art Museum, the arms are packed away in cases. But it is always enjoyable to chat about these reminders of our early history.

Cordially,

C. W. Sawyer.

Sunday,

April 9, 1911.

Dear Doctor;

I found this morning, that the letter I wrote the day after receiving the gun you so kindly gave me was not put in the mail as I directed. I greatly fear that you thought me remiss. I have had the gun cleaned and found that the trifling surface rust left hardly a trace; it is a fine looking specimen. I am exceedingly grateful for your kindness, and incidentally remark that I am not used to it.

Cordially,

Sanger.

32 Webster Place,
Brookline, Mass.,
June 18, 1911.

Dear Sir;-

Following the suggestion of my friend, Mr. Walter Drane, I am writing to you for information about the floras of Smuggler's Notch and the Willoughby Cliffs. He thought that perhaps you might have one of your lists of Willoughby plants, ^{to spare} and, if you have an extra copy, I should greatly appreciate it.

I am contemplating a trip to northern Vermont the last week in June, and am particularly anxious to get as many of the plants typical of the limestone dippe as possi-

P.S. Could you recommend
a good lodging place for two
college boys for a week near
Willoughby or Mt. Mansfield? C. S.

ble. If you have collected at
Smuggler's Notch, I should ap-
preciate any advice about that
region. Could I hope to find
Talysso bulbosa, *Orchis rotun-*
difolia and ^{*Listera acuminata* +} *Microstylis mono-*
phyllous at the latter place ^{or at} ^{Willoughby?}

Which of the two regions do
you consider offers the most
inducements to the botanist?
I am especially interested
in orchids, but would like
to combine these, if possible,
with the limestone-cliff plants.

Trusting that you will par-
don my long list of questions
and attribute them to the
eagerness of a nature lover,

I am

Truly yours,
Charles Schweinfurth.

ans

32 Webster Pl.,
Brookline, Mass.,
June 22, 1911.

My dear Dr. Kennedy;-

Your interesting letter was greatly appreciated, and the splendid Flora of Willoughby diligently perused. I thank you heartily for your kindness.

But I shall now trespass once more on your patience by asking a few more questions. I want to inquire whether the "road-house within two miles of Smuggler's Notch" is still in existence, and if so, its name and proprietor. I had been fearing that it was a thing of the past because I read of such an inn as mouldering in ruins.

at the mouth of the Notch, in H. W. Prestons account of this locality which appeared in the "American Naturalist" for 1882. I hope that there is still a hostelry in the near vicinity.

I am still wavering somewhat between Stowe and Willoughby, but think that perhaps the former locality has been less diligently botanized. But do you think that there are any "orchidaceous" arbor-vitae swamps near Smuggler's Notch? Which of the two localities do you think the most promising, all things considered?

Again thanking you for your kindness and hoping for an early reply, I am
Sincerely yours,
Charles Schwinn Jr.

Exactly matched some collected there, in 1900 and 1903, by Mr. Eggleston.

I was much delighted with the cliffs from the botanical and scenic points of view. The little green spot which we explored was a veritable little alpine garden unmatched in my experience for the variety of rare plants found in so limited an area. And from a purely scenic point of view those mighty perpendicular rock walls rising to a thousand feet were grand and awe-inspiring in the extreme.

But I must admit that they fully justified your description of "difficult botanizing... steep and slidey etc." Words could not describe

3 Webster Place,
Brookline, Mass.,
Aug 3, 1911.

Dear Dr. Kennedy;-

After all your kindness in aiding me in my search for Vermont rarities and advice to go to Welloughby, I feel some diffidence in writing to you of my trip to Smugglers Notch. But I think that from the first the weird nature of the name Smugglers Notch, and the combination of the cliffs with a high mountain decided me in its favor.

Accordingly, my friend Harold St John and I went to Stowe, and sought out the nearest possible stopping place to the cliffs. Unfortunate-

ly, through the illness of Mr. Harlow, proprietor of the Travellers Inn, which you referred to, we were unable to get lodging nearer our goal than five and one-half miles. But our quarters at Mr. (George W. Adams', on the direct road to the notch and Mt. Mansfield, were very comfortable.

On the cliffs we found much the same flora as could be expected at Willoughby I judge from consulting your splendid list. *Draba arabisans* was there in abundance, the three limestone *Saxifraga*, and *Pinguicula vulgaris* flourished on the wet and slimy spots high up on the cliffs. *Asplenium viride* grew everywhere in the damp crevices, and one specimen of *A. Trichomanes* was collected; but there was a strange lack of *Woodia glabella*.

We were rejoiced to find *Hedysarum boreale* just coming into prime, and another rich lot which I cannot determine. It is not *procum*. Bent like *Aspidogelone alpina* var *Brunstianus* Arnold, and it has more leaflets (at least fifteen) than *A. Blakei* Engelm, according to the manual. On the way up a slide was collected the dainty Engelm *Krypsophyllum* and others Antennaria canadensis. High up on the cliffs there was a single specimen of *Castilleja pallida* var *saxifriflorula*. But what delighted me most was finding what I had thought the real prize of the notch — *Cyanania remota* var *propinqua*. The specimen which we collected

polifolia as well as *Ledum* in prime. From here on, however, we had to force our way through a pathless forest of scrub fir, and we had the jaunt of our lives. We had intended to cross the entire ridge of Mansfield and strike into the north-facing cliffs of Smuggler's Notch from the north end, but the density of the forest and the lack of paths thwarted our scheme, and after following a thirty or forty year old trail which gave promise of leading out over the cliffs but which at length came to an abrupt end, we were forced to spend the night beneath the stars.

In one of the gullies on the north-west shoulder, above the cliffs we found *Arnica mollis*, in another moss

linguicula and *Saxifage anguloides*, and by a clear mountain spring a large colony of *Dieteria concolorivoides*.

The next morning we at length struck a logging road which led us out at Jeffersonville, whence we drove back through the hotel to our abode.

Altogether I was much pleased with our trip, and thank you sincerely for your kind interest. Now I shall hope to explore well enough by when possible, and it will be doubly interesting to compare the florae of those two famous cliffs.

Enclosed I am sending a letter from Mr. Mitsu which I should like returned. He spoke of you when I met him last year at Mt. Greylock, and I thought you might be interested in his trip. I had written him for advice, and, strange to say, he was just concluding his stay ^{at Stowe} when we arrived on June 26. It was most unfortunate that he met with such a fall on the cliffs.

I hope that I may have the pleasure of meeting you at an early date.

Very sincerely yours,
Charles Schwenkferth.

P. S. If you write, perhaps you will tell me where the *Comandra livida* grows on Mt. Mansfield, as we did not find it.

C. S.

my sensations when I paused to look back, when in our rocky aerial alpine retreat, and saw the cliff shelves off almost perpendicularly beneath. Evidently one must be an alpinist as well as a botanist to tackle Smuggler's Notch.

On the mountain we found comfortable quarters as you said with Mr. Adams, and he surely made special rates for us - \$3.00 a day. He must value botanists very highly.

We walked to the "Chin" and then down to the "Lake of the Clouds" then a mere mud-hole, where we found *Claytonia caroliniana*, *Empetrum nigrum*, *Habenaria obtusata*, *Viola nephrophylla*, and *Kalmia*

F.L-S.

U. S. DEPARTMENT OF AGRICULTURE,
DIVISION OF BOTANY,
WASHINGTON, D. C.

August 16, 1894.

Dr. Geo. G. Kennedy,
Readville, Mass.

Dear Sir:

Your favor of August 14, together with the samples of grasses which you sent for name, are before me, and in reply I would state that both the grasses are species of *Muhlenbergia*. No. 1 is *Muhlenbergia Mexicana*, and No. 2 is doubtless a slender form of *Muhlenbergia glomerata*.

If at any time I can aid you in the determination of grasses, it will give me pleasure to do so.

Yours very truly,

F. Lamson-Scribner

Agrostologist.

if I could suggest any solution of difficulties. But after all, though some philosophers sagely assert that man is an imitative animal, each has so much individuality that in questions relating to his own course of life he must come to his conclusions almost unaided by man.

I have in view the writing and publication of three or four essays carrying ^{at the expense of} the one which you ^{sent} into some of its natural ^{consequences}. If I ever do you shall see the book! I have a great many things which I want to do - Don't you have plans also?

My chosen profession is, as I have told you, that of an author, although of course I cannot announce myself as such, for it is one of the misfortunes or it may be advantages of this profession that one must first have proved himself a member of it by some actual result before he can throw off the mask and appear in his proper character. I am still acting in the masquerade and I wear the dress of a private tutor. Well

Brooklyn N.Y Oct. 15. 1842

My dear George

My card has told you of my profitless call and may add what it could not say that I found it an awkward door very hard and came away much disappointed since it was almost the last day of a very short visit in Boston and I feared that I might not have another opportunity of seeing you. Your letter told me where you were and I should like to have supplied certain Caecinae in it. Letters after all are very unsatisfactory modes of reaching truth and I would rather have had an hour's chat with you than have received a double postage letter.

I returned to New York almost immediately afterward and resumed my old tutorial chain, moving over to this boarding-house city for convenience. I am once more jogging along after my quiet fashion, coaching two somewhat slow boys in the morn-

ing, studying in the afternoon and in the evening, writing, writing or reading -

Student though I am I too have had my strong desire to take part in this pregnant war. I have wished to have a hand, as no doubt you also, in the birth of or rather in the release of some of the straits which hitherto the nation has been slow to receive. Physical difficulties have prevented me and I am forced to take the part of those angels of Milton's, for

They also serve who only stand and wait. Waiting and watching perhaps the signs of the times may be sooner seen by us than by those who look through smoke of cannon.

I have often been indignant at myself for quietly studying on, day after day, as if we were enjoying a summer peace but better judgement shows me right. It is only thus that one can keep healthy in mind: when ones own conscience is satisfied respecting his personal duty in the matter, it is worse

than folly to sacrifice his life to his impatient sympathy with others. Besides it is easy to see very intimate connections between this struggle and every one's special functions. In our case, as students, the connection is very close. As my enthusiasm for the principles shown for increases I desire to make it inspire my immediate work. If the President issues a proclamation when I am on the hunt for the aborigines of Greece, let me after my first absorbing excitement, not with greater eagerness after the wretch Pelagius who pops up in two different places. For made up my mind that to read our own national problems I must read History, and to read History I must read its best presentment Grecian History, and to read Grecian History I must begin at origine.

I have no doubt from your letter that you have had some of the effluence of thought which I also have passed through, and I should be glad

I need not say — but I take a page
to say it in for all that — how
pleased I should be to hear from you
again and to learn of you do-
ings and such of your plans as you
can set forth without violating any
good faith with yourself —

It to appear in that of an author I fear
that my friends would turn away from
me as a disreputable and dangerous mem-
ber of society — Nevertheless I occasionally
do become myself that may not wholly
be associated with my work.
The church demands of its candidates for
the holy office that they shall trust that
they are "unwarrantably" moved by the Holy
Ghost "to take the office and ministrations."
Without wishing to lower, by making com-
mon, this requisite of a "call", I do yet be-
lieve that one desiring to do right should con-
sult this monitor within and if inwardly
moved to be an author, why — let him write,
and his words will be welcomed by some —
Whether they will bring him bread is an-
other thing — Produce, produce, cries
Carlyle; if you have any thing within
you. I know that authorship is
almost universally with us associated
with some recognized profession or calling
but I think that there is room also for
the author, pur et simple, and such I
hope one day to grow to be —

Now I fear I am growing sadly egotistical, but the reason is that I wish to give you also an excuse for the same fault if it always is a fault. And if one ever has a right to speak of himself it is on his birth-day - This very morning as I was washing it occurred to me that to-morrow was not only my birth-day but yours also! and upon reference to the subtraction table I found that you were on that day to celebrate your majority! Welcome then to the ranks of the aged! I hope your birth-day was (I am getting sadly confused for I am now writing post natalium) not made an unhappy one by too sorrowful recollections; that it was one of hopeful anticipations. It is good philosophy to say live while we live if we only give the word the right meaning. I feel like shaking hands with you to-day on your happy entrance upon man's estate. I hope you have brought

much of your youth with you into your new possessions - but dear me! I am talking as if we both were in the red and yellow.

You see I am somewhat puzzled to know just what to write to you - I should have letters alone until after I had received an old acquaintance in the rational way, but the birth-day occasion gave me the pen irritation. And so I have written whatever came to the surface first.

It is all in my opinion not worth so much as that I am your former and continued friend

Grace E. Cudder

Not that this last in itself is of value but it certifies to the sincerity of all that precedes which would be wholly and irredeemably trash without such a certificate -

different ways, and I begin to think that
being one however independent he appears
is really chained & tethered by invisible
bonds. True as government but strong as iron.

I am writing hurriedly at the close
of a dull day, but I wanted to say
just a word. I don't know that there
are any questions expecting myself that
I could make much show in answering.
Do I mention in my last having pub-
lished a book? It is a children's book -
Seven Little People & their Friends - Not
perhaps the Cambridge Senior but at any
rate the authors friend may be interested
to look over it some day at New & France.
The Jan. 7th n.º of the North American Rev-
has a paper of mine - Phases of Schol-
arship - That the Cambridge Senior may
think fit to look at. Thank you for
the Catalogue. I was glad to see it -
Write to me if you can - I always
shall be glad to hear from you -
Truly & affectionately your friend
Thomas E. Scudder

Brooklyn 9 Jan^y 1843

My dear George

The closing of the year found
me very busy and I put off from time to
time answering your letter until it grew
so late that it seemed hardly worth while
to write at all since I expected to see you
when at home during the holidays. I went
home at Christmas and came back after
New Years, but alas! I tried in vain to
get the needed hours for an excursion to
Cambridge. During the few days of my
vacation I was called hither and thither
and always subject beside to a powerful
appeal at home. You may easily believe
that I enjoyed myself most thoroughly,
but I regretted that I could not add
to my many pleasures that of seeing
you.

Now I am back again and am
more going through the prosaic round

of my life here. Not but that I can suc-
ceed in eliciting a fair blossom of poetry
even out of such sterile soil as I live in.
We make our own Labradors and our
own Carolinas I suppose. Indeed our
most wonderful dreams of life, built upon
a foundation of fancy, oftentimes fade
into insignificance in the light of a
glorious excellence which we had not
suspected in our best-romantic lot.
Your letter impressed me very much, both
on ^{its own} account of its and because it ached
over the fissure between my recollection
of you and my new acquaintance. I
could not help feeling that if you had
succeeded in making your own such
views as you expressed, you had created
the possibility of a finer fruition for
your cherished hopes than a course-
free of opposition would permit. If we
have a road because of obstacles which

we ourselves have placed there, we may
expect failure, but it is no pool's or cow-
ard's mind that ^{is supposed} recognizes obstacles
beyond his control. I do not believe that
the grimmest duty, cheerfully accepted, we
fail to like the best in the fairy tale
to be metamorphosed into a beauty.

There is not much difference after
all in our chosen lives; mere modes
of expression do not cover the purpose;
so you may be an Greenland traveller
and I a Boston student and we may
yet keep up considerable of a likeness.
Rejoice in the divine sight of dreaming.
- καὶ γὰρ τὸ ὄρα εἰς Διὸς ἔοικε - says your
Iliad, for that no one can despoil us
of, and it is in our power whether we
shall dream away work or hold our dreams
for the dead hours. It comes with a
fresh surprise to me when I find you will
be embarrassed by considerations of home
connections. I have been checked but in

as a well educated man, and is
familiar with the various
wonders of the natural world,
and that he will be glad to
show them. He is a
good deal of a man, and
and he said in a good way
his presence at the school
was about three weeks
regards himself a learner -

He has a very
good friend, Miss Kate Miller,
1107 N. W. corner, and is a
student of the school and has
been sent far her researches
have extended to do not properly
know. Her father was a
gentleman now is one of our
most esteemed artists. The
father and daughter spent their
summers in the Lake. As
and Miss Miller always brings it

the Ladies' society which some
interesting specimens of insects
which she has studied during
the summer.

Now I have received quite
a number of names and other
information - not all of it in
hand, but sometimes "out of
the mouths of babes" &c -

I have many times, besides
the great pleasure and visit
made since Dr. Harris - was
sent in to take me, and then
more and more and Dr. Hainman
in the month - I am sure
and in much you would
enjoy taking her mother.

I hoped that I might have
my own little boat that we could
one day go out to Endsville,
but my husband's sails were
so low, as not to accomplish it.

Dr Kennedy

My dear Sir

To make you an apology for not answering your letter of Apr 18. I must inform you that I was in hopes to send you the other Doaba in flower soon after the receipt of your letter but it escaped my not very diligent search until to day when I found it in fruit which I mailed you this evening. I do not think either of them have been found in any other station in Massachusetts except Danvers where I found the Doaba Verna three or four miles from the original station in what is now known as Peabody and I don't think

it can be found in Canton as I have
searched the woods there many times for
other plants in the early spring time however
you may do better and I hope your search
may be rewarded, Do you have *Ranunculus*
fascicularis if so will you press a specimen
for me as I am much in want of a fresh
one. I should like very much to take a
botanical trip to the Blue-Hills and if I
can get Miss Page to join me I shall take
advantage of your kind offer please give
my best wishes to Mrs Kennedy

I am Very Respectfully
Yours
J. H. Sears.

SALEM, MASS.,

May 17th 1886

Dr Kennedy

My Dear Sir

I have never found *Ranunculus fascicularis* in Essex County but have no doubt that it is here *Camptotorus rhizophylus* grows in Middleton Essex County Mass. and I have good specimens from the locality hoping you will have a pleasant journey in Europe I am

Very Truly Yours J. H. Sears.

Readville Mass

Dear Sir ~

I take liberty to write
you, thinking perhaps if
you visit Lake Willoughby
this Spring, you would like
to spend a week or two in
"Olyce River Valley", Salem Pond
and "Lake Memphremagog."
We would be pleased to
accomodate you & your
friend Rev George A. Pitkin
of North Roburn Mass
(I have written him today)
and I expect that

Mr. J. Winter of Derby Line
will be here.)

Our price for board & room
is from \$4.00 to \$7.00 per week
and use of boat included
we can furnish a team for
a small sum... and I would
be pleased to show you to
places of interest - for wild fowls
&c &c

If you decide to come
please write me and I will
make arrangements ~~for~~ for you
from ^{Newport} Depot on from "Willoughby"

60 St. Luke St.
Montreal, 4th Aug. 1912.

My dear George

I ran across a few scribblings of Cora's on a small volume of Byron's works among Aunt Mary's books the other day, in her well-known handwriting - whether original or not, they appeal to me too keenly not to pass them along - unfortunately, the first page has been torn off.

"Stands bare

"And brown and stern the waked mountains wait
With steadfast patience for admission there.

"Lombro and strong nor heeds the hurricane
"That blast the living things they fall upon
"And close beside the river weed and cone
"The ancient Neghland burial place remains."

"Oh the dead! the dead! they follow us thro' the world!
"Of all life's treasures none so sweet as this
"I said it over when to darkness lurked
"From perfect joy and counted it for bliss
"Who would be happier and such glory miss?
"Yet oh! sometimes wild human longing saith
"There is no glory in the bitterness.

It is curious none of us discovered this

before, being in Byron's book it may be that some of the lines are quotations, of course if you want the handbook I shall send it along with pleasure.

I have an idea she was constructing a platform for something ancestral, that Highland burial place was in her mind's eye and there were one or two memos, thus:—

"David Ferguson 1870
Great grandmother's brother
Flora Ferguson.
H. Ferguson 1817.
Jas Ferguson 1788."

"Mrs Boscomf.
Maria
Amy
M^r Bourgeois."

Jessie & I start tomorrow (5th) for Victoria B.C. for a month or so dropping off at Lagan, Banff, Winnipeg, Niagara Falls &c. Of course it is nothing to us but we take Agnes & Cora with us to see their own country. Jessie joins me with her kindest love & we shall say au revoir
Sincerely yours
A. Shaw.

Thomas P. Shaw, M. D.
110 Eighteenth Street
Lowell, Mass.

July 14, 1904.

Dear Dr. Kennedy, -

It has come to my knowledge
that a Mrs. H. N. Woodward,
50 Merrimack Square of this
city, is so confident that her
life was saved by the "Medical
Discovery" after she had been
given up by physicians, that
she will be more than glad
to subscribe to any testimonial
which might be desired.

I do not know whether

you care to ~~trouble~~ about such things, but thought I would at least tell you of the case, and I shall be glad to be of any further service in the matter.

My trip to Boston did me no harm, but, on the contrary, much good, and I thank you for doing so much to make the affair enjoyable and comfortable.

With kindest regards,

Thomas P. Shaw

New Jersey.

Truly yours
William Skinner

735 West 75th St.
New York, Apr. 8th '16

My Dear Doctor: -

I feel rather guilty after having
delayed writing you so long to
acknowledge the receipt of the tickets
you sent me, and to thank you
for the pleasure they afforded. They
say a poor excuse is better than
none, but I have not even that to
offer, consequently I shall have to
trust to that disposition to forgive
the erring which I am sure you
possess. (You can smile here if you
feel like it, but don't make use of any
other expressions.)

So you are off to Europe again
this summer. Well, all I can do is
to envy you, and wish you the

delightful time I feel assured you
will have. You say you are
booked to sail on the 17th May -
then you will be here on the 11th
at the latest and could you not all
of you dine with us on that evening
"en famille" as the French say. I am
sorry we can not take care of you
for the night or for whatever
time your stay in New York is, but
you know the capacity of the average
apartment is limited and I suppose
you would not like to divide your
party. We shall all be delighted to
have as much of your time as possible.

Emilie sails on the Baltic on
the 6th June with Mr. + Miss Fern.
They intend spending the summer in
rural England but have not yet
arranged their program fully.

It would be very pleasant for them
if you could all visit in England
and she will let you know her
whereabouts when matters are arranged.

Carrie will be with us for the
greater part of the summer at
Chocoma. It will be hard to
get Mrs. Skinner away from her
flower garden but even she thinks
she would like to go somewhere
else another year. We have been
very comfortable in the little cottage
and enjoyed a sense of freedom
and feeling of home with none
of the troubles of housekeeping.

We (Mrs. S. + I.) go to Atlantic
City on Tuesday next (10th) to stay
until the 24th. It always seems
to do Mrs. S. great good and builds

during two months of the summer
and a niece of ours from Baltimore
visited us until we came home in
October.

Emilie, as you know, spent the
summer in England - she and
her friend Miss Fenn - and they
"had the time of their lives", (I am
using their own expression). They
wandered about wherever the fancy
took them, staying where and as
long as they liked, and following
nothing but their "own sweet wills".

Emilie had a camera with her
and succeeded in getting over 150
excellent views.

After a short stay in London they
went to Devonshire, visiting Exeter,
Dartmoor, Lynton, the Devon Country, &c,

235 West 75th St.

New York, Dec. 23rd 1906

My Dear Doctor:-

I can't try to tell you how glad
I was to receive your letter of the 14th

We had not heard from you since I
wrote you in June, and we came to
the conclusion that you were not well,
so I thought it best not to bother you
with letters as I knew you would
write when you felt like it.

Mrs. Skinner and I attended the
Peary lecture on the ticket you so
kindly sent me, and I assure you
I never enjoyed anything of the kind
so much before, which is saying
a good deal as I always enjoy
anything of the kind.

Peary seemed remarkably well

considering what he had gone through. He was exceedingly modest in speaking of himself, which it seems to me is not usual with men who have done and suffered so much. All the disagreeable details were very lightly touched on, but one could imagine what a sledge journey of over 400 miles over such obstacles and under the circumstances, must have been, and how few could have borne the hardships, anxiety and responsibility attendant on such a trip.

His views were very fine and evidently colored with great care by an artist — not overdone as I think they usually are. If he comes to Boston you must not miss hearing him and seeing the views. I have to thank you for a great treat.

I am very sorry to hear of the

misstep to Dr. Hal, but glad to know that his eyes are on the way to entire recovery. It must be, as you say, a very singular case.

Mrs. S. and I feel great sympathy for Mrs. Richardson. It is indeed sad that such misfortunes should fall upon her at a time of life when things should be shaping themselves as easy as possible. I judge from your letter that the hotel is being rebuilt. I hope it will be, and that we can once more visit Willoughby where we spent so many pleasant days, and that Mrs. Richardson with mental and bodily health restored may be there to welcome us.

Carrie was with us at Worcester

get up courage sufficient to enable her to cross the ocean, so I have about given up the idea, as I do not feel like urging her to it.

I suppose, nothing unexpected happenings, we shall make our usual trip to Atlantic City, for two or three weeks in the spring, as it seems to do her a great deal of good, and that reminds me, as the late lamented would say, that perhaps you and Mrs. Kennedy would join us. I think you would enjoy it and that it would do you both good, and I know we should be delighted.

The place is entirely different at that time from what it is in summer, the crowd not so great and the visitors as a whole, of a better class. I do not mean by this that no good people go there in summer, many do, but

you know what a resort like Atlantic City with its hundreds of hotels, to pay nothing of excursion trains at that time daily, must be in summer. You could come and stop with us and all of us go down together. Think it over during the winter.

Christmas is near to us again and an air of mystery, or secrecy reigns in the family. Bundles received and hidden away - winking glances and unexplained things generally. Locked drawers, locked closets and sly disposal of suspicious looking parcels. Every one with something on hand which admits of no explanation and the shoe closet locked up too. When asked once what I wanted I said I should like a "Teddy Bear", and was told I had better have a milk bottle, which was unkind I think. I wanted to be young again to suit the occasion, but

I went back a little too far I suppose.
Anyhow I am going to hang up my stocking,
if I can find a clean one that is not
locked up.

We all join in wishing you and
Mrs. Kennedy and the whole family
including the grand son, a merry
Christmas and a happy New Year.

Mrs. Skinner specially desires to give
her love to Mrs. Kennedy.

Sincerely yours
Manning Skinner,

then they took in the cathedral towns,
Exeter, Winchester &c. being at Salisbury
at the time of the great railway accident,
Oxford and its colleges, Warwick, Stratford,
the Lake Country, and so on to Scotland,
visiting Edinburgh, Loch Katrine, Loch
Lomond &c and to Glasgow, returning
to London in early September. And
all this did two "batchelor girls" alone,
without a single mishap to themselves
or their baggage. Truly, as I heard
an old fellow say: "the times aint as
they used to was." You may believe
I was glad when they got safely back
to us.

I enclose two or three of her views. One
of them you will no doubt recognize
as of the same view you sent me
and of which I made a slide.

I am afraid Mrs. Skinner will never

Hotel Royal Palm
Miami, Fla.

February 23/98

My dear Dr. Kennedy

Many thanks
for the Calendar.
What a fine old tree!
I do not think I
have seen it in life.
May the Woodmans
spare it. I have
sent another lot of

Miriam misses to Mr. I shall be sure to send
Faxen to be shared any masses I may find
with you, and am kind regards to Mrs.
sending a third today. Sincerely, Mr. Irvine

But I fear there joins in remembrances
are but two or three to you both.
species among them all.

One of them looks like
an common F. bygoneset-
ica, the burnt-ground
species. How that a
wide distribution?

Very sincerely
Miriam Turnbull Jepson

Beautiful. Mr. Williams
and his friend went
to Crawford's yesterday
noon. I hope to re-
main here for a week
longer if all is favor-
able. Please remem-
ber me kindly to Mrs.
Kennedy, and with
renewed thanks for your
kind thought of me
I remain very sincerely

Alice Turnbull Jepson

Mt Washington
July 1/98

My dear Dr Kennedy
I fear you think
me very ungrateful and
ungracious to delay
so long acknowledging
your kindness.
But, till now, I have
not been sure of your
whereabouts. I cannot
thank you enough

for that letter, Had I heard the news first from the Boston paper the shock would have been much greater, As it was I was completely prostrated for a time, and life will never be just the same again, with that gentle presence missing. How glad I am, and how

thankful, that his death came painlessly and with friends near him. And that it was in fair June and among the northern hills he lived so well. I wish I might have met you here but the weather seemed unfavorable for my pursuits and I delayed coming till Wednesday. I reached here to find a clear lovely sunny, and yesterday too was

We ourselves can take
care of Mr. Charles Faxon
for a little but I fear
we must give up
serving other friends.

Another year why will
you not come up earlier
and see how long it is.
Kind regards to your
family, in which Mr.
Dowie joins.

Yours very sincerely
Alvin Mumbull Sloper

Gale Cottage
Franciscan

September 20/00

My dear Dr. Kennedy

First let me
offer sincere apologies
for my apparent indif-
ference. I received the
pamphlet containing
the interesting paper
on our dear Mr. Edwin
Faxon and meant to
acknowledge it at once.

But I have been
very much occupied
and Mr. Charles Fox's
mention of you last
evening reminded me
that I had never
written you. Let me
thank sincerely now
for remembering me.

The article is excel-
lent and I am sure
Mr. Fox on himself
would have approved it,

Now the unpleasant
part of this note comes,
I am afraid we must
deny ourselves the
pleasure of seeing you
this fall. The severe
cold which set in
yesterday - thermometer
below 32° with ice -
and the departure of
the last boarder with
the serious illness of one
of the servants has made
the closing of the house
- Lafayette - seem but, we
shall all go in a few days.

Subscriber
Name

Columbia College, New York,

February 17, 1896.

My Dear Sir:

I am about to begin a distribution of mosses of the Southern United States. The distribution will be made from time to time, as good material becomes available, in instalments of about fifty species.

Only good material and ample specimens will be issued and a uniform rate of ten cents for each specimen will be charged.

A limited number of sets of the first instalment are now being prepared. If you decide to become a subscriber, please fill in the attached blank and return it by the enclosed envelope.

Yours respectfully,

John K. Small.

Bedford Park, N.Y.City.

June 12th,1906.

Dr.George G.Kennedy
Readville,
Mass.

My dear Dr.Kennedy:-

I have an excellent collection of cryptogams, consisting of lichens, hepatics and mosses, which I am forced to dispose of, both on account of lack of space to house it and lack of time to care for it. The collection comprises specimens which have been accumulated by me for the past fifteen years, and which may be indicated as follows :

1.A complete set of specimens collected by myself in eastern North America from Canada to Florida.

2.Specimens from,
Canada; Fowler, Faxon, Macoun.
Maine; White, Porter, Rand.
Vermont and New Hampshire; Grout.
Massachusetts; Cummings, Rand.
Connecticut; Wilson, Green.
New York; Britton (Mrs.), Nash, Peck, Vail, Berg.
Pennsylvania; Porter, Garber, Burnett, Linn & Simonton, Bell, Heller,
Reed.
New Jersey; Austin, Britton (Mrs.)
Maryland; Taylor.

Virginia; Britton (Mrs.), Vail, Heller.

West Virginia; Nuttall.

South Carolina; Green.

Georgia; Harper.

Florida; Austin, J.Donnell Smith, Garber, Underwood, Tracy, Schaub.

Alabama; Earle, Baker.

Mississippi; Tracy, Skeehan.

Louisiana; Langlois, Cocks.

Kentucky; Price.

Missouri; Demetrio.

Ohio; Kelsey, Kellerman.

Wisconsin; Cheney.

California; Howe, Bolander.

Washington; Piper.

Idaho; Leiberg.

3. Miscellaneous specimens from Grout, Holzinger, Heller, Underwood, Morong, Best, and others.

4. Most complete set of Hellers, Hawaiian mosses.

5. The Langlois, (La.), Garber, (Fla.), Price (Ky.), Nash (Catskill), and Linn & Simonton (Pa.) represent the largest sets of these collectors sent out.

6. Sullivant & Lesquereux's, Musc. Bor. Am. and Sullivan's, Musc. Allegh. (These were Jaeger's personal sets.)

7. A large collection of European and South American, specimens.

The collection is divided about as follows :

Lichens	464
Hepatics	347
Sphagna	848
Mosses (approximate)	9,000
	<hr/> 10,659

The above list speaks for itself, but I may add that taking all its elements together the aggregate forms nearly a complete representation of the North American moss flora, and of course the most complete representation of the mosses of the southeastern United States and of Pennsylvania ever brought together.

A portion of the collection is arranged on herbarium sheets, while another portion is merely on the smaller cards ready to be arranged on herbarium sheets. The specimens as a rule, especially those of my own collecting, are ample.

I value this collection on the basis of 9 ¢ per specimen by actual count. Do you wish to purchase it?

Awaiting an early and hoping for a favorable reply, I am,

Yours truly,

A handwritten signature in cursive script, reading "J. P. Small". The signature is written in dark ink and is positioned below the typed name "J. P. Small".

Dr George G. Kennedy,
Readville, Mass.

Dear Sir:--

Your note enclosing \$1.00 for two years dues the to Chapter has just come and I send receipt for the same and thank you very much. You said "The Bryologist" but I presume it is all the same to you and we should be sorry to lose you as one of the Sullivant Chapter members. You get the Bryologist just the same in either case so I take it for granted you will not care. I will put in a few leaflets for your use if it comes in your way.

We should be very glad if you could help us at the June meeting. by sending in any list of mosses already collected by you or an account of any work in any line. We are anxious to hear from as many of the members as possible.

Very truly yours,

(Miss) Annie Morrill Smith

March 27th. 1900.

Please read the April Bryologist at once!

ANNIE MORRILL SMITH.

The Bryologist,
A QUARTERLY JOURNAL DEVOTED TO THE STUDY OF NORTH AMERICAN MOSSES,
ALSO OFFICIAL ORGAN OF
The Sullivant Moss Chapter,
78 ORANGE ST., BROOKLYN, N. Y.

My dear Dr. Kennedy:--

The time for the June meeting of the Sul. Moss Chap. in connection with the A.A.A.S. is drawing near and I am very anxious to know just what I have to depend on. I knew sometime ago that Mrs. Britton had written you and found out that your health might interfere with your doing at this time. But since then I have heard from you through Miss Small that you had already in hand the work which was on her mind, and towards which she had been working for the three months ^{previous} with Mrs. Britton.

The list of Mosses for Mass. being well under way and better done (Miss S. added) than she could do. Now in view of this can you not send me your list or some part of it and a few specimens for the Chap. Herb. And are you not to be with us at that time?

Dr. Grout is very anxious that this should be, Mrs. Britton is a very busy woman and this we all know, and it is very hard to learn from her just what she is doing. Hence our anxiety on our own account!

An early reply will oblige, yours very truly,

Annie Morrill Smith.

May 19th. 1900.

Can you furnish me with true Hylocomium
of " " cupressiforme
I am in need of these for comparison!
a plant much for a slide???

May 17th 1905
My dear Mr Kennedy-

Your note of March 2nd found me preparing to go South for a month. I was fine six weeks and this is my apology for delay in answering about the specimens of Adirondack mosses you once so good us to desire from me.

I am sorry to say my supply is exhausted - and though I had both in mind last summer at Little Mass. where both were collected I failed to find a new supply - my list - as it stands represents the total collections (all by myself) of three

summus on the tract. or I might
say six vacations - though the first
year I collected only flowering plants.
and the results of my last summus
make at Little House are yet unpublished.
You note that the grasses & sedges
were left out - and this was owing
to a lack of knowledge & therefore
intent on my part. Last summer
however I did collect some of each
group - and when the Garden
people - calm down after their various
trips to the ends of the earth, I
hope they will have time to make
them out for me. This summer I

shall hope to collect more - I added
150 species of glomerating plants &
fungi to my previous list - You see
we are fortunate in having as John
Dunham Mrs Harris (lichens) and
Miss Haynes (hepatics) and I have
the mosses - and stand for the
rest as well -

Thanking you for your interest
& only sorry I cannot send what you
desire at this time -

Sincerely yours

Samuel Howell Smith

My dear Dr. Kennedy,

Mr. Whorf and I are planning a little trip to South Orleans for over the thirtieth of May and we want you to be of the party.

Our plan is to leave on the 1.08 P.M. train at South Station for Yarmouth, Mass. on May 29th. At Yarmouth, we will have a team and drive to South Orleans [about twenty miles] where we will stop at our Old House and put in

Sunday and Monday morning as
the spirit moves. I think I can
provide you plenty of Asparagus
and a good loaf and we will
try and make you comfortable.

We have plenty of firewood
and blankets and Charles Rogers
will have fires going in the
House before we arrive, so that
there will be no danger from
dampness etc. We shall return
on the 3.26 P.M. train from Orleans,
arriving in Boston on Monday
evening about 9 P.M.

I hope that you can be

with us, as I am looking forward to seeing
you on Cape Cod and Charles Rogers wants
to see you again, too.

Yours sincerely

Mr. George J. Kennedy,
Readville, Mass.

Dear Mr. Kennedy:

I am just in receipt of a copy of your paper upon "The Flora of Willoughby, Vermont". This is an article which I have wanted for a long time, but did not suppose it could be obtained. I thank you very much indeed for this, as I am much interested in publications relating to the flora of Vermont. I especially hope to use this on a visit to that section.

Very sincerely yours,

Perley Spaulding
Pathologist.

Readville Mass. Jan. 16/13
10. Stark cor.

Dear Dr. Kennedy.

I am sending you a copy of the
Subscription paper which I am soliciting
with, toward our building funds of our
little chapel.

You will remember of having met
me at the Readville Sta. a short
time ago and as you requested me
to remind you about our church
fund. I am taking the liberty of
so doing while it is fresh in
our minds.

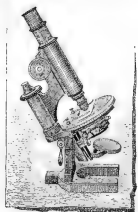

I shall never forget the dear kind
people of Blue Hill that very so

very, very kind to . . . while I
worked in the Telegraph Office
at Leabridge. It is certainly
a true saying, Kind words
and kind deeds never die

Many blessings are laid up in
store for the dear good people in
their kindness. One of the greatest
blessings in the world is doing for
others.

I would say the small amounts on this
paper were pledged one evening by
some of the congregation. Our members
are hard working people but not
much means. Hoping all of your family well.

I remain very truly
Yours
Mrs James Spencer. (Mrs Hunt)

OUR SPECIALTIES
SPENCER MICROSCOPES & ACCESSORIES.

Dr. George G. Kennedy,
Readville, Mass.

Dear Doctor: -

Your order of the 24th is at hand. We have never added
the Greenough binocular compound microscope to our line, although we have
been preparing for doing this and expect in the course of time to do so
ourselves. In the meantime it is made by Zeiss, whose design is
for the stand alone, which would make it cost you \$75.00 net, duty
paid. The special objectives for use with it would be the combination
(P1) (Plankton Searcher) (a) (a) (a) and one of still lower power, 55mm focal
length. These are supplied in special settings and mounted in pairs on
the slides. The price of each of these pairs would be 45 marks, which
would cost you \$17.10 duty paid, except the (P1) which would be 50 marks,
and which would cost you \$20.90 duty paid. Zeiss states that the most
suitable eyepieces would be the Huyghonian 1 and 3. These would cost you
\$2.66 each duty paid. It would give us pleasure to serve you if we may
have that privilege.

Yours very truly,

H. Kellner

ST. JOSEPHS RECTORY
85 REGENT STREET
ROXBURY - MASS.

May 22d, 1915.

Dr. George G. Kennedy,
284 Warren Street,
Roxbury, Mass.

My dear Dr. Kennedy:

I desire to thank you most sincerely for your very generous gift to Saint Josephs Parish this morning in the two very beautiful paintings that you have sent us. I am very pleased to say that I shall have a memorial inscription attached to these pictures so that for all time the people of Saint Josephs parish shall know who their generous benefactors were. In the meantime I shall have the picture of the Madonna restretched and the frame repaired. When the work is completed and the pictures are in place I shall be very happy to notify you so that you may come to see these pictures that are so dear to you in their new and permanent home.

Thanking you for your kindness and assuring you of my high respect and esteem, I am

Sincerely yours,

M. J. Splaine.

WASHINGTON AND MILK STREETS
TELEPHONE MAIN 1429
CABLE ADDRESS "HARSPRAGUE"

BOSTON, Feb. 12, 1913.

My dear George:

I got your note last night with the slip regarding the bell ringers. Of course after we start in on a subject, whatever appears is interesting, and I think there is rather a peculiar interest attached to the old church bells. Perhaps I am prejudiced. At any rate, I am very much obliged to you to having noticed the slip and sending it to me.

It is hardly a proper retaliation to send you in return a bill, but as you urged me to do it I am going to venture to enclose one.

Yours very thankfully,

Henry H. Sprague

...Crestlawn...

8 BOWDOIN AVENUE, BOSTON, MASS.,

April 7th 1944.

Dr. George G. Kennedy,
Dear George,

We shall be glad to have Mr. Kennedy and yourself attend a very informal reception tomorrow from 3 to 5 P. M. in honor of my mother's ninety fourth birthday for she will be ninety three. She will be glad to see you for she was sorry she could not see you when you called.

Sincerely Yours
Harvard Stevens.

8 BOWDOIN AVENUE
BOSTON. MASS.

August 21st, 1913.

Dr. George G. Kennedy,

My Dear George,

Since seeing you I have had a talk with Ned Cogswell and he seems inclined to take some of the Olympia Light and Power Co's bonds. He said he would give me an answer in a few days. I think if you would take some it would induce him to do likewise. As one of the larger stockholders you have a substantial interest in the Olympia Company and is it not worth while to help it a little especially when your example may lead other stockholders to do the same? For years I have given the company an amount of care and attention for which I cannot expect to be adequately recompensed, and have built up a valuable and prosperous enterprise. Am I not entitled to the support of the stockholders? I have no fault to find with you in that respect. But for your own interest I ask you to strengthen the financial status of the company by purchasing say five bonds, a perfectly sound and good investment, and not an outlay or expense.

By paying off \$15,000 or \$20,000 of debt this year we will immensely strengthen the standing of the company in the view of sundry concerns which have been regarding it with covetous eyes for several years, Stone & Webster, Byllesby & Co. Washington & Oregon Corporation et al. I deem this consideration even more important than the financial.

From the proceeds of the 12 bonds we have on hand I aim to pay the Amerivan Trust Co. \$10,000 and apply the balance of \$2000 on the debt to the Capital National Bank in Olympia. Also to pay on the latter the net earnings for the rest of the year, all

that can be realized from sale of land, from the Surety Company and other sources. The strictest economy is enjoined upon Manager Faulkner. No expensive improvements are in sight. The company and plant never were in such good condition as now, the town is prospering and steadily growing, and all we need is to exercise a little pluck and confidence. But it is discouraging to ask our stockholders for a little support and be refused. You have no idea how a note from you saying you would take the bonds would help me. It is not ~~so~~ necessary to take them immediately, suit your own convenience.

Sincerely Yours,

Hazard Stevens

CRESTLAWN

8 BOWDOIN AVENUE, BOSTON, MASS.

STEVENS — In Dorchester, Nov. 4th, Margaret Lyman Stevens, widow of General Isaac Ingalls Stevens, in her 97th year. Funeral services at her late residence, 8 Bowdoin Ave., Dorchester, on Thursday, Nov. 6th, at 10:30 A.M. Interment at Newport, R. I. Relatives and friends invited to attend.

Nov. 4, 1913.

Dr. George G. Kennedy,

My Dear George.

My dear mother
passed away without suffering
at 7 this morning. The
funeral will be at the house
at 10.30 A. M. Thursday, and
the interment will be in
Newport.

Sincerely Yours
Hazard Stevens.

You may destroy & not
return.

My dear E.

I am dreadfully re-
miss, for this year for the
first time the anniversaries
have passed without my
writing you. It was not
that I forgot the 18. but that
for I thought of you several
days in succession and also
on the morning of the day
promising myself later, when
I could, for I was on a trip
to write. Forgive me, and now
although past the date, give
Priscilla all my best wishes
for many happy returns -
I believe she is twelve, isn't
she? Before very long I hope
to see you - I am not quite
certain, but unless you have to

the contrary, I am sailing
from Naples by the Koenigin
Luise of the Norddeutscher
Lloyd on Dec. 6. and she
is due in N. Y. December 18.

On arrival in N. Y. I am go-
ing out to Plainfield N. J.
to see if I can make arrange-
ments for a lecture - Unfortun-
ately no dates are made
but I expect to give a set
of lectures in Troy, two in
Rochester, N. Y. a set at Mrs.
Washington B. Thomas' in Boston
and several at schools. I
wish you would be kind e-
nough to speak a word for
me at Priscilla's school. I have
not yet written to Mrs. von Mead
and your endorsements might
help me. Mrs. Wmsor (school)

has written to Miss Katharine
since saying that she would
like a ticket, and there are
a number of other places whom
I hope to make arrangements.
I regret being quite so late,
but the slides I am having
made are preventing me from
leaving earlier than Sunday
evening, Dec. 1. - If you want
to write me, send a letter to
the No. German Lloyd Co.,
N. Y. to be given me.
In Boston my letters are to be
sent care of Mr. Wm. H. P. Ketchum
The Westminster, 645 Beacon St.
I feel that this is quite an
undertaking but people have
been awfully good and kind
and I am fairly certain of

enough to pay expenses and
something over and I hope to
have more work when I am
on the spot.

I hope all of you are well
and that the "new house-work"
is indeed a treasure for you.

So, dearie, it will not be so
very long. I am blue at leaving
Mother and George but with
God's blessing and help I hope
to be prospered and to return
here to find them both well
and happy.

Good-bye for now Dear
Much love always

Faithfully yours

Florence A. Stone

33 WEST 33^d ST.
NEW YORK.

Dear Doctor Kennedy

When you showed
me the little *Euphrasia*
officinalis at the Lake of
the Clouds on Mt. Washington,
it was quite impossible
to associate the minute
plant with any with which
I had had any acquaintance
but gradually I began to
realize that it was the
Euphrasia which authors
call the mossy banks
about *Mürren* and
other high Swiss places
but that it was a
miniature representation
of that interesting plant
I thought to send you
some of the Swiss specimens

as soon as I reached home
but many things have
prevented me from
looking for them - With
this I send some specimens
which are not large
for Swiss specimens, but
giants when compared
with our Mt. Washington
variety -

We hope that you &
Mrs Kennedy and your
daughters are well -
and we much wish
that we might see you
all here -

We are well here
but Mrs Stevens & Fannie
are quite tired having
just returned from
Ogdensburg where they
have been attending
upon the Rt. Rev. Bishop

Thank you, Mrs Stevens's - much, who has
recently died -

With kind regards from
Mrs Stevens, Fannie and myself to
you all

Very sincerely yours

Wm. Stevens

AMHERST, MASS.
DEPARTMENT OF VEGETABLE PATHOLOGY AND PHYSIOLOGY.

July 28 /99

Dr Geo F Kennedy

Dear Sir;

Your letter received . I have only a small collection of mosses myself and do not endeavor to keep up a herbarium myself The College has a very good coll of mosses many of which are from denslow and have been examined by Austin . There are also I think some from Frost. I would be pleased to add any thing you care to send to the College Coll, as it is in good condition and the specimens will not spoil as long as I have charge of it . The specimens I sent were collected by myself but as I had none of my labels here I sent the College labels . I would like to hear from you in

regard to the H, acutum when you make an examination of the same.

Do you collect Characeae ? I have some duplicates on hand.
I have done very little collecting for some years as my work leads
me in an intirely different direction.

Yours Truly.

GE. Blome

HATCH EXPERIMENT STATION

Oct. 6, 1904.

Dr. George E. Kenney,
Readville, Mass.

Dear Sir:

Please accept my thanks for your publication entitled,
"Flora of Willoughby, Vermont." I am always glad to get hold of
these different Floras.

Should you have any more copies to spare, I would like very
much to have you present one to our library, and you could send it to
Pres. H. H. Goodell. I recently suggested to Pres. Goodell that he
get all these Floras and he has endeavored to do so.

Yours truly,

DIRECTIONS FOR SENDING MATERIAL FOR EXAMINATION.

In sending specimens of diseased plants or species for determination, it is essential to send sufficient quantities for a thorough examination. In selecting diseased specimens of plants to be sent, care should be taken to choose as far as possible such as show different stages of the disease including all of the affected parts. These should be carefully wrapped in moist paper or sphagnum moss and packed in a tight box. A full description of the trouble and conditions pertaining to them should also be given.

In sending plants for determination it is desirable not only to have the blossoms or fruit, but as much as possible of the whole plant. Specimens of trees should include at least a small branch with several leaves.

Postage on specimens of plants is at present one cent for each ounce or fraction thereof.

HARVARD UNIVERSITY

CAMBRIDGE, MASS. Nov. 23, 1915.

Dr. George H. Kennedy,
Readville, Mass.

My dear Dr. Kennedy:

I thank you very much indeed for sending me the volume relating to the Class of '64 of Harvard. I shall be very much interested in looking this through, as I know a good many members of that Class. I have already read, however, the notice of our mutual friend, Mr. Crocker, whose kindness to me I shall never forget.

As I look through the book and note the stars opposite so many names, I am forcibly reminded of the flight of time and of the fact that we are all growing old together.

Again thanking you, I am

Very truly yours,

Geo F Swain

1872

I have just received your kind letter
and am glad to hear that you are
well. I hope you will get a good
rest and be able to do better
than you are now, but I must not write
any more for I must go to bed. I
will write you again when I have
an opportunity and hope you will
write to us. Auntie has put them in a
very safe place and we shall be able to wear
them. The horses are all better and
we use them almost as much as ever.
Please give our love to all from
Fannie

It is not a small matter
to be engaged in a long
and arduous journey
to the north and back
again, and it is not
to be undertaken
without the most
thorough preparation
by the friends and

also
have
the
best
of
the
head,
and
the
best
of
the
hand.
It is
not
enough
to
have
the
best
of
the
will,
but
we
must
also
have
the
best
of
the
power,
and
the
best
of
the
time.
It is
not
enough
to
have
the
best
of
the
love,
but
we
must
also
have
the
best
of
the
wisdom,
and
the
best
of
the
courage.
It is
not
enough
to
have
the
best
of
the
faith,
but
we
must
also
have
the
best
of
the
hope,
and
the
best
of
the
charity.
It is
not
enough
to
have
the
best
of
the
grace,
but
we
must
also
have
the
best
of
the
mercy,
and
the
best
of
the
kindness.
It is
not
enough
to
have
the
best
of
the
truth,
but
we
must
also
have
the
best
of
the
justice,
and
the
best
of
the
peace.
It is
not
enough
to
have
the
best
of
the
right,
but
we
must
also
have
the
best
of
the
good,
and
the
best
of
the
beauty.
It is
not
enough
to
have
the
best
of
the
virtue,
but
we
must
also
have
the
best
of
the

courage.

A. H. S.

THE BOSTON GLOBE.

Boston, January 11, 1910.

Dear Sir:

My attention has been called to the condition of George B. Frothingham, for many years with the Bostonian Opera Company.

Mr. Frothingham is now over seventy years of age and is too old to follow up his profession.

He is in straightened circumstances and I thought that if a few of his friends would start a fund for the support of Mr. Frothingham and his wife that it would carry them along for a time. I will start the fund with \$25.00.

Any funds sent to me will be devoted to the care of Mr. and Mrs. Frothingham. I will look after it personally.

Hoping that you can see your way clear to send a donation, thereby aiding a worthy couple, I am

Yours Sincerely,

Chas. H. Taylor

Dr. George Kennedy,
284 Warren Street,
Roxbury, Mass.

*sent check of
\$20 from
anonymous*

THE BOSTON GLOBE.

Boston, January 21, 1910.

Dear Sir:

Your letter of January 20 containing check for \$20 for the George B. Frothingham fund, has been received for which please accept thanks.

I will personally look after the disbursement of it and see that it is placed where it will do the most good.

Yours Sincerely,

Chas. D. Taylor
R.

Mr. George G. Kennedy,

Readville, Mass.

Hubbard House,
Northampton, Mass.
Oct. 22. 1904.

Dr. Kennedy,

My Dear Sir -

I want to thank
you most sincerely
for you look on
the Millington Horn,
which came thro
day since, and
pleases me greatly.
It certainly reveals
a very pleasant work

Spent at Killbuck by
some years ago, when
you were busy study-
ing the plants of that
most delightful
region - I have
often wished to go
there again, and
perhaps I may, with
your book in hand,
as a botanical guide.

And it was most
delightful to see you

again last summer at the
Barnard Meeting - I saw me
of Mr. Smith's picture of the East, so
I shall not forget how you look -
Think several thanks for the book
and the pleasant - numerous in-
quiries, I am
Very sincerely yours -
Emily Willmore V. B. V.

Roxbury, Oct. 28, 1911.

Dear Mr. Kennedy,

I have been asked to write something for the school paper (Fairpod) about events during our old school days in the Roxbury Latin School. Have you any interesting items to send me?

yours very truly,
Walter Eliot Thwing.

ordered Jan 27-1897

U. niv. of Minn.
Minneapolis, Minn.

Dec. 24. 1896.

Dr. Geo. G. Kennedy

Dear Sir:

American Algae
Century II is now ready
for distribution. It contains
about 20 specimens from
the hot water springs and
geysers of Yellowstone Park,
and others from various states
and Canada. The mounts
are much larger than those
sent out in Cent. I and
the labels more complete.

If you desire a set
please let me know. The
price is the same — \$10 and
express charges.

Yours sincerely
Josephine E. Tilden.

Minneapolis, Minn., Oct. 19 1895

Dr. Geo. G. Kennedy, Readville, Mass., Dr.

To JOSEPHINE E. TILDEN,
University of Minnesota,
Minneapolis, Minn.

FOR	American Algae, Cent. III (unbound)	\$10.00			

Received payment

Josephine E. Tilden

There has evidently been a mistake in the sending of an unbound Century III instead of a bound volume. I have your name on my list as desiring the unbound specimens. If you will send back the package which you now have - C. O. D. I will gladly forward to you, prepaid, a bound volume. I furnish bound or unbound specimens as subscribers desire.

I am very sorry the mistake has occurred and hope that I

may keep your name on my
subscription list. I think you
will like the bound volume.

If you have also an unbound
copy of Cent. II I can furnish
you with a bound volume. if
that also.

Yours sincerely

Josephine E. Tilden.

Jan. 3 1894

Dr. Geo. G. Kennedy

Dear Sir:

I am exceedingly sorry to have had this trouble arise through the sending you of an unbound volume of Am. Alg. and also for the delay in making it right.

I send you to-day prepaid a bound copy of Cent. III Am. Alg. - by express. I hope you will be pleased with it. I could not avoid enlarging the volume since the Puget sound specimens are of so awkward a size.

I send you also a correction label.

Yours sincerely
Josephine E. Tilden

October 5, 1904.

Mr. George G. Kennedy,
Care Mrs. N. R. Richardson,
Willoughby, Vermont.

Dear Mr. Kennedy:

It was certainly very kind of you to remember me with the beautiful little publication on the Flora of Willoughby, Vermont. You have prepared it in splendid style and the photographs are most beautiful, and carry me back to the day when I had such a pleasant drive with you and the ladies from Willoughby to the railroad station.

I have just moved into a new residence at 1605 Kenesaw Avenue, having been out of the country for nearly a year on fish cultural work in South America. While looking over my books and papers in the basement I came across your pamphlet on the Flora of Willoughby, so you see I was reminded of you only two days ago - very likely about the time you were mailing your booklet to me.

I am mailing this letter through Mrs. Richardson because I have lost your city address. I hope when you come to Washington you will look me up. With kindest regards to yourself and Mrs. Kennedy,

Yours very truly,

Wellesley Hills

16 Jan. 1901

My dear Dr. Kennedy:

Thank you for the copy
of your sketch of my old friend Edwin
Faxon. His brother had already sent me
one, but I am glad to have a second
copy from the author. You did the work
well, and you had a good subject

Very truly yours,

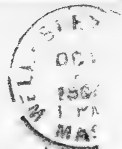

Bradford Torrey

Newton Lower Falls

6 Oct. 1904

My Dear Dr. Kennedy:

I am just back from a fortnight
in Franciscia, where I heard you repeatedly
spoken of by my "walking mate", Mr. C. S.
Faxon, and now I have to thank you for
a copy of your "Flora of Willoughby, Vt."
It is highly welcome, and I am greatly obliged
to you - both for the book and for the re-
membrance. Sincerely yours,
Bradford Torrey

Glenn Dace
Prince George & Maryland
August 20, 1915

My dear Dr. Kennedy:—

I have only one
excuse for sending you
this note - the desire to
tell you that in spite of
long years of silence we
think and speak of you
so often, and of dear Mrs.
Kennedy, who is separated
from you now.

Our life here in Maryland
is becoming more and more
one with the life of the

in his garden digging away the
weeds and vegetable but especially,
among the roses. A man is
hired to milk the farm, which, so
far has been a luxury, costly more
in money than it returns, but
giving us our returns, - a nice
raze for our one little boy &
such playmates and companions
as we can find for him - a
brandy or whisky one given father
and mother - and a fixed place

people among whom we live
Our farm keeps us out
of other mischief, being
itself a very demanding
institution, but I think its
claims upon us, have been
for the most part, for our
good. Mr. True sees less of
it than he likes, being
a servant of Uncle Sam,
but there are holidays and
the month's vacation, which
may be taken by days and
half days, and then Mr
True's delight is to milk

Letter copied Jan 7 1915

Middlebury, Vt

December 21, 1915

My dear Mr Pynne: -

The only record on the old book kept by the Trustees runs as follows:

"Resolved that Royal Turner, Esq. Alumnus of Harvard University, and Rev Horatio Parsons, of Williams College, be admitted to the degree of Master of Arts."

Unless there should be found some accidental notice of the bestowal of the degree in some letter extant, or some reference in the Middlebury paper in August, 1824, I do not see how the particular reason for the giving of the degree can be ascertained.

Edward Turner, Yale 1818; AM Yale 1821, was a Tutor in Middlebury 1823-25 and then Professor of Mathematics and Natural Philosophy from 1825-1838. Could there have been any relation between the two?

Middlebury gave this latter Mr Turner
the degree of A M in 1825. He died in
1838, evidently or presumably in
office.

I am sorry not to have found out
more definitely what you wished
to know.

Again wishing you both the
compliments of the season

I am very sincerely
Mayson K. Sanford

letter which may possibly
give a hint of a reason,
as nothing but the mere fact
seems to stand in any records
or paper - "Edward" is not a
James name, and I don't
remember ever knowing of it
in any of the branches in
the past - but possible the
two young men may have tried
to trace a connection, or may
have been friends by the
coincidence - and in some

8 GLOUCESTER STREET

Boston -
January 21st

Dear Cousin George: There has

been considerable correspondence
between Mr. Payne (Mr. Beach's
brother-in-law) and Middlebury
College, but we don't get
much information about
Grandfather James' degree -
I am sending you the only

such way. The degree might have
come about - unless it happens in some-
thing, I am afraid or shall not
know any more. There is no one now
to remember learning about it, as
perhaps Aunt Abby might have. I
don't think my grandfather ever
kept any diary which was preserved, at
least: for if so, I think she would
have been sure to have made refer-
ence to it then, in talking about the
past. I think I will ask for & return
the enclosed note, as Josephine will
be much interested in it all, and I
will send to her - I don't think she
can help us however -

We are not beginning the New Year
yet well as to weather, are we?
but I hope it will bring all good
things to John and yours.
Truly
yours,
sincerely yours,
Alice M. J. B. each.

R. Thaxter, 7 Scott Street

Cambridge, Mass., U. S. A.

June 9 1905..

My dear Dr. Kennedy:

A few days since Dr. Farlow handed me your very liberal contribution toward my South American expedition and although I appreciate the fact that it is given to Dr. Farlow for the Herbarium I wish to express my own appreciation of your generosity and I sincerely hope that the results of my journey may justify the interest that has been taken in it by yourself and other friends of the Herbarium.

I was very sorry to miss the last meeting of the Club and at the same time to lose an opportunity of saying goodbye. I wish you were going with me to look after the mosses, but although I am very conscious of my own incapacity in this direction, I shall endeavor to gather in all I can in the intervals of fungi, algae and Laboulbenias, the pursuit of which will no doubt keep me sufficiently occupied to render my year of lonely exile bearable at least.

With kindest regards,

Sincerely yours,

Roland Thaxter

"Hotel Kosmos", Corral, Chile
Jan. 6. 1906.

My dear Dr. Kennedy:

Since I came here from Concepcion (horrid place!) about five weeks ago I have often had you in mind and wished that you and Dr. Farlow could join me in some of my rambles or rather scrambles in these forests and share the pleasure of seeing the many lovely things in the way of mosses hepatics and lichens with which they ~~are~~ decorated, and which, though hardly noticeable in dry weather, come out like a jack-in-the-box as soon as rain begins to fall. I have never before been in a filmy fern region and our first view of their beauty is a sensation not soon to be forgotten. They are every where here in the woods, some growing on bushes and vases down to the water edge, and, where they drap the rocks and tree trunks in the cool shady recesses that one finds when the brooks have cut deep runways through the hills - very beautiful. The woods in general in this neighborhood, which is one of hills or almost mountains, are very hard to penetrate, partly from the steep declivities and partly from the usually dense undergrowth of a huge fern and of the solid *Samolus*; but one can usually scramble up the footways where the bushes, *Samolus* and fallen trees permit, and here, on the cool moist rocks and banks as well as on the tree trunks, grows a profusion of mosses hepatics and lichens as well as filmy ferns, the mosses some of them very beautiful as you may judge from the two small bits that I enclose. I wish every thing were in good fruit, but suppose I should be duly grateful that so many have obliged me in this respect. The large dead-stem *Polytrichum*, which I also enclose, with stem broken green in the woods usually on earth wound up by fallen trees and some times is 18 inches tall; though seldom in fruit and not in good condition at this season. I feel - very ignorant among these things and regret very much that an expert should not occupy my shoes for the moment; since the fungi, for which I came, are neither very abundant nor very peculiar and my Chilean experience has been a very disappointing one in this respect; though I have a damn lot of about fifty new *Subulbunias* from

here and from Buenos Ayres, but mostly from the latter place.

I am purposing to leave here in a few days by a Kosmos steamer for Punta Arenas in the Straits and hope to see the famous Smyth's Channel, but I believe the route taken by these boats is not always fixed and I may be disappointed. I had intended to go from Punta Arenas to southern Sierra del Huevo but I fear that, for several reasons, I shall have to abandon this portion of my programme and either go for a month to the Falklands or directly to Buenos Ayres after which my movements are quite uncertain and I may even return without attempting the tropics.

Dr. Harlow wrote me a short time since that the Botanical Club had celebrated its 15th birthday, it is hard to believe that it can be so aged! Hoping you all had a good time and wishing I had been there too, believe me

Sincerely yours

Roland Thaxter.

Hope you will excuse "Hotel Kosmos" steamer!

Feb 24, 1903

7 SCOTT STREET
CAMBRIDGE

My dear Dr. Kennedy: as you will
doubtless remember I have been
for some years preparing a second
Memoir on the Labor business
the bulk of which has increased to
such an extent that I have almost
begun to despair of ever accomplishing
its publication. Encluding the new
acquisitions of the past four years and
even after cutting out as much of
the text as possible there remains
over three hundred pages of the latter
to be provided for, which are illustrated
by forty four plates, two since finished
some of which I showed the other evening
at the Club. By using appropriations
from two years the publication

Committee of the American Academy
have been able to promise one
thousand dollars toward its
publication and I have myself
agreed to contribute three hundred.
Since, however, the total expense
will be about eighteen hundred
than writing to one or two persons
who have taken an active interest
in the work of our Department
in the hope that they be able
to secure the balance of five
hundred dollars which will
be needed to cover the total
cost, and venture to ask
whether you would be willing
to give any assistance to
this end. The Committee

inform me that if this amount can be
procured need be available by May. That
they will proceed at once with the printing
of the text and plates and issue the Memoir
in June.

You have been so generous formerly in matters
which still others have concerned that I have
with the greatest pleasure brought myself to
write you in the connection, and think that in
doing so they will have pleased you for a
year generally. Sincerely yours

Robert Hanks.

300 MASSACHUSETTS AVENUE, BOSTON.

Sept. 10 1904

Dear Sir:

Your *Desophularia* is the
villosa var. *Marylandica* of Gray's Manual
although it has some characteristics
differing from the specimens I have from
Cape Island. Bicknell has made another
specimen out of the Manual species called
S. leprella which I do not know very well.
Will look it up further. Very truly,
Wm. S. Peck

51 Elm St. Woburn, Mass. Sept. 13, 1904

Dr. G.G.Kennedy:-

Dear Sir:-

I am much interested in your list of plants and ferns found at Willoughby, and for that reason I have not been in any haste to send for the specimen of *Botrychium lunaria*, in your possession and found by me in August. As I suppose you would like very much to make your herbarium of the Willoughby Flora as complete as possible, I am willing that the fern should remain with you for the present at least. You are doubtless familiar with the circumstances of my finding it through the letter which Miss Lorenz wrote you about it and also by what I wrote to Mr. Rich. I write this especially to call your attention to another thing I found at Willoughby, on the West side of the Lake.

You will recall the "Beaver Meadow" that fine sphagnum swamp where so many orchids and heaths are found, about half a mile from the lake. In going out of that swamp over toward the Barton road I passed through a pasture and close beside a large rock in damp ground I found what I took at the time to be *Scrophula Marilandica*, L. I took a specimen to Mr. Rich for examination, and after a week or more he has sent me the inclosed card, in which I see he agrees with me in its identification; for I understand that *S. nodosa*, var. *Marilandica* of Gray's Manual is the same as *S. Marilandica*, L. as given in Britain's Manual. I have not seen the leporella, but I hardly think from the description that it can be that. I have a specimen which I can let you have, if you wish. It should undoubtedly be added to your list, as you seem to have included the flora of "Beaver Meadow", for it grows only a few minutes walk from that interesting swamp. An intelligent farmer there told me the place was not over $\frac{3}{4}$ of a mile from the lake. Will you be in to visit the exhibition at Horticultural Hall next week? If so I might meet you and give you the specimen and talk with you about this and *Actaea*, etc.

Sincerely yours,

From Geo. K. Tilton

51 Elm St. Woburn, Oct. 10, 1904.

Dear Dr. Kennedy:-

Thanks for your esteemed favor just received. As you have no specimen of the *Scrophularia* I send you mine for your herbarium. This will give you time also to study it and determine satisfactorily its species. I will inclose label in this letter.

I thought I would write a brief account of my finding the *Scrophularia* and the *B. Lunaria*, for the *Rhodora*:- but as you propose to do this I will leave it to you, knowing that you will give me due credit.

It would be a great privilege if I might meet you at Willoughby next year. Yes, I will look for the *A. angustifolium*, and I shall want to find the *A. viride*, which will not be new indeed but it would be a real pleasure to see it growing in its own habitat.

Yours with high regard,

Geo. H. Tillon,

51 Elm St. Woburn, Nov. 15, 1904.

Dr. G.C.Kennedy:-

Dear Dr. Kennedy:-

Your letter about sending Botrychium lunaria to Mr. Eggleston, came to hand this morning. I am perfectly willing that you should send it and do with it in every respect as if it were your own. I suppose Mr. E. wants to verify it for himself.

I wonder if you might not like to take a brief trip to Willoughby with me and any one else who might wish to go, — in the month of June and then we could explore Beaver Meadow and other spots on the Mt. Horr side to much advantage. I could not spend more than a day or two at that time of the year, or not more than two or three days any way. I would like to see that interesting sphagnum swamp when the Orchids and Heath's are all in bloom. There is a large amount of Ledum there too.

My note on the lunaria will come out in the November Rhodora:-

Yours with high regard,

Geo. H. Tilton

VIEW OF WILLOUGHBY LAKE, WESTMORE, VERMONT.

Aug. 23, 1905-

Dear Dr. Kennedy:

Had I known you were abroad, I should not have been sending notes and cards to your Readville address. I write this to give a sort of summary of my observations here the past three weeks.

I suffered one nice specimen

The *Pennyroyal* is common in a
large pasture near Mill-creek
and the *S. juncea* has quite a colony.
You can find it just over against the
Richardson place on the So. West side
of Mt. Hor's ridge, by taking the So. Bar-
corn Road - the road that leads from Mn.
R. to So. Barton.

Hoping that you may return home in good
health and spirits, I am

Very Truly yours
Wm. H. Tilton.

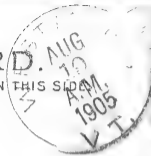

Of *Actaea eburnea* & wither
not seeing how I could pre-
serve the large root-stalk.
But Mr. Rich has preserved the
specimen I sent him and I
must refer you to that. A few
days^{ago} I discovered *Solidago jun-*
cea, Ait. just over the Mt. Hor
ridge from Mr. Richardson.
I have a nice specimen of
this in press for you - also of
the *Hedeoma*. This makes five
specimens in all I have been per-
mitted to report:-

Polygala lamarina Des. } 1904
Scrophularia leporella (Pursh) }
Actaea eburnea Rydb. }
Hedeoma pulegioides Penn. } 1905
Solidago juncea Ait. }

FOX HALL.

WILLOUGHBY LAKE.

WESTMORE, VT.

I see that *Veronica serpyllifolia* L. var. *borealis* Lantae
 is in your list: I had overlooked it: But I do not see
Hedeoma. — I hope to have another Goldenrod to
 report — was glad yesterday to find a good specimen
 of *Asplenium trichomanes* L. by Prof. Morr. No *Verde* yet.
 Shall look to-morrow for another *Actaea elbursina*
 G. H. T.

H. S. Webster, Barton Landing, Vt.

Geo. C. Lang, Barton, Vt.

Westmore, Vt.

Aug. 12, 1905.

George G. Kennedy, M.D.

Dear Dr. Kennedy:

I believe I am ready to add two more plants to your Willoughby list. I have found in considerable quantities *Hedeoma pulegioides*, Pers. and a single small colony of *Veronica serpyllifolia* L. They both grew near Mill Brook in a pasture. This is about a mile from the northern end of the lake. I have numerous specimens in press of the *Pennyroyal*, and a small one of the *Veronica*, which has gone to seed. You can have the latter and a good specimen of the former.

(over)

I have been quite skeptical
about *Actaea elurnea*, Rydb.
thinking that all the peculiar
specimens found were hybrids,
but the other day I found
two or three which seemed to
answer to *A. elurnea* as
described in Britton & Brown.
White berries, slender pedicels
and a knotted, thickened root-
stock. I sent one of these to
Mr. Rich though I had to cut
it in pieces - and the berries
shattered off as I handled
it. I enclosed them however
in a paper - and sent the whole
thing in a box. If this proves
to be the *A. elurnea*, you will
doubtless put it in your list
as revised.

Mr. A. B. Emerson found a milk-
weed down the Willoughby River
within a mile of the lake. I had
a glimpse of it - but have

not examined it - It is doubtless
A. incarnata, or *pulchra*. I will
try to examine it soon.

I looked for more Moonwort - but
have not found it - I saw what seem-
ed good specimens of *Asplenium*
viride, Huds. high up on Mt. Morr.
but I had no means of getting
at them - I hope to get them by a
pole, I am aware that you have
good specimens of it through Mr.
Winslow, but I want a good one
myself -

I may explore a little
in Derby next week -

Shall be home in Woburn the
last of August - While here I
stop with Rev. Edwin Rose -

Very Truly yours.

Geo. T. Tilton

VIEW OF WILLOUGHBY LAKE, WESTMORE, VERMONT.

Aug. 16. 1905.

Dear Dr. Kennedy:

I inclose to you Mr. Rich's letter, showing that he has no doubt that the specimen I sent him was *A. elumna* Rydb. You can see it at the Hall. I would try to get one for you but of course the berries could not be kept, and I hardly know how to manage the root-stocks. If I come across another specimen I will see what-

I can do with it: I let one
good specimen dry up. With I had
sent it to you in a box. I will
try again. I trust that you will list
it if you are satisfied after seeing
Mr. Rich's specimen. Wish I could
meet you here.

Sincerely yours.

Geo. W. Tillon.

Dear Mr. Linton

*The specimen of a cisteis came to hand
in very good condition and I have made
an herbarium specimen of it.*

*It must be a cisteis and I am very glad
to have it.*

*Hope you may find other things of interest
during your sojourn in Vermont.*

Very truly yours,

Wm. P. Rich

The Shaw School of Botany,

William Trelease,

Professor in Charge.

Cambridge, Mass.
St. Louis, Mo., 2 / 20 1887.

Dear Mr. Kennedy:

I am glad to learn that you are
safely back from Montreal after what must have
been a pleasant trip. I had misgivings
as to whether you were on that unfortunate train un-
til Dr. Scam told me that you were the morning
before. You are to be congratulated on having taken
the day train.

Please give my kindest regards to
Mr. Kennedy and your family, and do run over
to the Garden some day if you find time.

Very truly,

Wm. Trelease.

H. C. IRISH, HORTICULTURAL ASSISTANT.

PLEASE ADDRESS CORRESPONDENCE

TO THE DIRECTOR.

ST. LOUIS, MO.,

Dear Dr. Kennedy;

Thank you greatly for the Tayloria. I am no moss fiend, so it is not surprising that I don't know about as to its occurrence in America. It is a nice find and a fine specimen. By the way, don't fail to let us have duplicates of your nice finds. I assume you they will be preserved, and it's just such things that make an herbarium valuable to the worker.

My wife joins me in regards to Mrs. Kennedy and Gurney. Grace would do so, I'm sure, were she here, but she is in Baton. (27 St. James Ave.)

— Yours,

Wm. G. Allen.

I'm delighted once
more to see your hand-
writing and to hear of
the good times you and
Mrs. Kennedy are having
right along.

The last winter has
been a very hard one
for us, through the long
doubt as to the recovery
of our boy Sam after
a systemic infection
following appendicitis.
But Sam just came
from a two months' run
in tropical Mexico with him
and he is perfectly well, so

THE MISSOURI BOTANICAL GARDEN.

Office of the Director.

St. Louis, Mo.

Will have to search long
and in chosen circles to
find happier people than in
Arc. And then, too, Mrs.
Kernedy may give to Mrs.
that last June Mrs. McLean
undertook the rearing of
a fourth son - and she
is pronounced to be a
fine baby.

Alas! There is little
hope here for a builder
for the Harvard herbarium
building. We, too, are
in sad straits for build-
ings - and shall be for
some time.

I shall look up the
Allet's Fairmore matter

THE MISSOURI BOTANICAL GARDEN.

Office of the Director.

St. Louis, Mo.

and see if I cannot
put you in touch with
the right man, though
just how I can't do so.

Of course repetitions
are stale to you and
Mrs. Kennedy, but we
are hoping that you
are going to at least
look at ours and that
we shall see you when
you do so.

With warm wishes
me in wishes for all
that is good, for you
and yours.

Sincerely,

Thos. Mearns.

Rose cottage April 26th 1882

Dear prof. Trelease.

I have never met
the *Aletris farinosa* in my get.
The *a. aurea* occur near Tyler
but is not very abundant.

I have not botanized much
this year and I think that
I will not roam as much
as I did last year. Mr. Greene
is quarried and I am more
interested in my home that was
very desolated since the death
of my good wife.

I am very truly
yours.

J. R. Keweenaw.

Dallas station A. R. F. D. S.

Ans
4/28/82

THE MISSOURI BOTANICAL GARDEN.

Office of the Director.

St. Louis, Mo., May 3, 1904.

Dear Dr. Kennedy:

Professor W. L. Bray, of the State University, Austin, writes me that there is no *Aletris farinosa* at all in his part of Texas, but he thinks that "a considerable amount of it could be found in the vicinity of Orange, but scarcely in quantities to be of economic importance. Judging from collections made six years ago, the flatter part of the pine lands in that part of the State possess a considerable percentage of species of that genus. I will not be sure that they are *farinosa*, however. It would be a matter of interest for a botanist to go into that region on purpose to look up the subject."

Should you want to take the matter up in any way with him, I am sure you will find him a good correspondent.

Sincerely yours,

Dr. G. G. Kennedy,
Readville, Mass.

16, October, 1899.

Dear Doctor Kennedy,-

While rasting about for some means of getting an adequate representation of the habit of my pet *Deana*, it occurred to me to try Halsted's "Soland" method of printing, using the mass itself as a negative.

I am sending some prints to Dr. Grout and Mrs. Britton and I feel sure they will interest you if you have never seen the process applied to mosses. It is easily applicable to both blue and silver prints.

I have not perfected the thing yet but think the method promises

well, since it is not a true photograph and is exactly natural size, the presentation of details is out of the question, of course.

I don't know but a set of these prints made from well-preserved and authenticated plants would be worth getting out for the use of those who lack material of this genus. If accompanied by some prints of microscopic details, the usefulness would be enhanced.

Yours very truly,

54 Concord Ave.
Cambridge. }

Rodney H. True

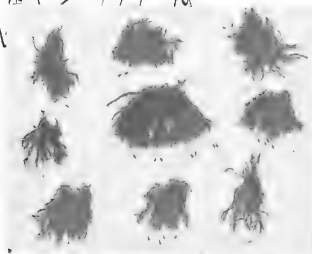

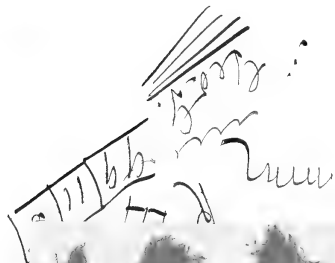

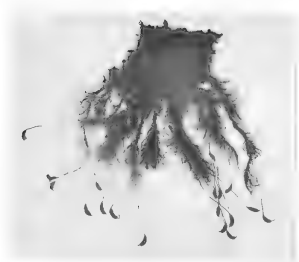

54 Concord Avenue,
Cambridge, Mass.

Oct. 21, 1899.

Dear Doctor Kennedy,

I regret exceedingly that the grip is following you so persistently and so painfully. I don't know the habits of the trouble very well, fortunately, but I hope the return of colder weather may be helpful and relieve you of it entirely.

I am glad you like the prints I sent some days since. I have been experimenting further and think I have improved on them somewhat. I enclose a couple of samples made by the new method. In the little *Dirom fulvellum*, the position of the peristomes when dry is nicely seen.

D. *fulvellum*

It would be very helpful. I have no sample
prints showing leaf tissues now but can pre-
pare some as soon as time permits.

I should be very grateful for your opinion on this
matter.

The Solandri process is described in Bull. Torrey
Bot. Club 1893, p. 455 (Dec.).

I fear that I am unable to suggest any
thing concerning the moss with a warranted
protonema.

I should be very glad to see the *Seleneis* and the
letter of Sir J. E. Smith sometime.

With best regards from Mrs. True and myself
to Mrs. Kennedy, I remain, yours very truly

Robert M. Lane

I have thought somewhat of acting
along the line of a suggestion made
in your note. I could prepare special-
ly a set of *Am. Dicrana*, perhaps
thirty species in all, and present
in addition to the habit picture,
detailed sketches of leaf structure
and such other details as would
be valuable in working on the
genus. Such a set should have
a market value, fancy, and
should I feel enriched that I could
make it bring me in a small
profit on the expense involved
in preparing the set, I should be
glad to do it, feeling sure that

Nov 9. 1907

3413, 13th St, N.E.

Brookland, D.C.

Dear Doctor Kennedy,-

I wish to acknowledge with pleasure the receipt of your very interesting flora of Willoughby, Vt.

The contents are in themselves of great value apart from the illustrations but these are so fine as to add greatly to the booklet.

I spent a few weeks in the New England "Mountains" this last summer with Mrs. True but found my collector's enthusiasm somewhat damped by the fact that I have not had a minute for mosses in the last two years. I still have some hope, however, for the

future.

We are enjoying life in Wash-
ington very much and find the
opportunities in Congressional lines of
activity limited only by our op-
portunity to enter into them.

I would echo the oft expressed
wish of Mrs. True in hoping that
you and Mrs. Kennedy may
sometime give Washington a
visit, in which way afford us
the pleasure of seeing you.

With best regards to yourself
and those of your family whom
we have met, I am,

Sincerely yours,

Rodney H. True

1221 Newton St., Brookland, D.C.

March 27, 1906.

My dear Doctor and Mrs. Kennedy;

I know you will both be glad to know that we have had the great happiness of welcoming a son to our household. He came on the nineteenth and has spent his first week in fastening his grip on the situation. He weighed seven and a half pounds when born. He has a good keen eye & all

be "a model patient."

This letter is written at
his special request and
we, all three unite in the
heartiest good wishes for
you both and for the other
members of your family.

Yours,

Very sincerely yours,

Rodney H. True.

Have begun again to look at
an occasional Discernment.

appearances and looks as
though he would be able "to see
into the secret of the "masses'
"plain hearts." Still, he
may like something else.
At all events, he is a great
satisfaction and pleasure
to us. Mrs. True passed thro'
her ordeal with exemplary
spirit and is now recover-
ing in an equally exemplary
way. The doctor pronounces
